COMMENTARY

MARKET TEMPO SLOWS, BUT PRIMARY PIPELINE BUILDS

Following a strong year for securitised markets, it is not uncommon for activity to pause over the holiday period. Consistent with this seasonal pattern, public primary issuance has remained subdued through January.

While the informal convention for these public transactions to reach investors ahead of Australia Day has now passed, we continue to hear that a sizeable first-quarter pipeline is building across both RMBS and ABS markets. As issuers move beyond the holiday window, execution now becomes critical.

ORIGINATION ADVANTAGE SUPPORTS DISCIPLINED DEPLOYMENT

Gryphon maintains a robust, repeatable investment process which seeks to ensure consistency in portfolio construction through varying market conditions. This discipline has supported GCI's ability to deliver sustainable monthly income whilst maintaining a strong focus on capital preservation.

Importantly, Gryphon is active across public term markets, private term placements and warehouse securitisations. These opportunities can offer attractive structuring and pricing dynamics relative to broadly syndicated deals, supporting selective deployment and portfolio optimisation.

Irrespective of the market tempo, our approach remains disciplined, asset-led and focused on delivering sustainable income with strong capital preservation.
